

Sensormatic AMB-1200 Deactivation System

Controlling shoplifting and maintaining an aesthetically pleasing shopping environment is critical to the success of independent retail businesses. Tyco Retail Solutions' Essentials solution suite features all the Electronic Article Surveillance (EAS) components necessary for the value conscious retailer to address shoplifting and preserve the bottom-line.

As part of the Essentials solution the Sensormatic AMB-1200 Deactivation System, a tabletop solution, is installed directly on top of the counter. Its ultra thin design blends perfectly into any point-of-sale (POS).

The AMB-1200 is fully compatible with our suite of Essentials products including: an array of tag and label options for protecting a wide selection of items from apparel to accessories helping to enhance throughput at the front end.

Moving shoppers through the checkout process quickly will drive repeat business and improve store productivity. The ultra thin design of the AMB-1200 allows cashiers to seamlessly pass items over the antenna, expediting the checkout process while improving customer satisfaction. Falling short will leave shoppers open to looking elsewhere – experiences will be shared with family, friends and coworkers.

The Sensormatic AMB-1200 Deactivation System helps cashiers deactivate items efficiently, delivering a consistent positive shopping experience.

Key Features:

- Ultra thin design, specifically for a tabletop solution
- Compatible with the Essentials solution suite.
- Acoustic magnetic technology.
- Reduces unintended alarms at the exit.
- Audible and visual indicators provide confirmation labels have been detected and deactivated, enhancing front-end productivity.
- Items can be passed over the antenna and deactivated in a single pass regardless of security label orientation.

Additional Information:

For more information please contact your local sales representative or visit us on www.sensormatic.com

Product Compatibility:

- Essentials solution suite
- Standard Remote Alarm
- Ultra-Max AM Labels
- Local Device Manager II

**The AMB-1200 system connects to an external controller (AMB-1200C). The external controller has the flexibility to be positioned either vertically or horizontally.

Product Specifications:

- Length – 31cm (12in)
- Width – 18cm (7in)
- Thickness – 1.7cm (0.46in)

Benefits

- Seamless integration with the Essentials solutions, extending the platform's capabilities.
- Deactivation in a single pass regardless of label orientation, maximizing point-of-sale throughput.
- Helps improve customer satisfaction rates by speeding shoppers through checkout.
- Built-in audible and visual indicators provide immediate feedback when label is detected and deactivated.
- Increases employee productivity.
